Toronto Hydro is proud to be recognized as a Sustainable Electricity Company™ by the Canadian Electricity Association (CEA). This award is an important milestone in our sustainability journey and ensures we are mitigating the risks associated with climate change, emerging clean technologies and increasing stakeholders’ expectations. As a result, we strive to provide electricity to our customers in a way that minimizes financial and environmental risks while maximizing the benefit to society.

Toronto Hydro Corporation is a holding company, which wholly-owns two subsidiaries:
- Toronto Hydro-Electric System Limited - which distributes electricity and engages in Conservation and Demand Management (CDM) activities; and
- Toronto Hydro Energy Services Inc. - which provides street lighting services.

The principal business of the Corporation and its subsidiaries is the distribution of electricity by Toronto Hydro-Electric System Limited. Toronto Hydro-Electric System Limited owns and operates an electricity distribution system, which delivers electricity to approximately 740,000 customers located in Toronto. It is the largest municipal electricity distribution company in Canada and distributes approximately 18% of the electricity consumed in the province of Ontario.

At Toronto Hydro, we strive to attract and retain employees through a combination of benefits, positive working conditions and a culture that values team work, results and accountability.

**Certified Power Line Person (CPLP) Apprentice**

The CPLP Apprentice is responsible for the construction, maintenance, operation and troubleshooting of the overhead and underground distribution system, which includes all voltages, in a safe and efficient manner. These duties will be performed to the level of the applicable skills and knowledge of the incumbent, under the direction of a Certified Power Line Person.

- Demonstrates safety awareness and adheres to safety rules and regulations
- Prepares and conducts tailboards at the job site
- Constructs, maintains, inspects and operates the overhead and underground distribution system including emergency repairs
- Installs, removes, constructs, alters, operates, inspects and maintains all equipment associated with the overhead and underground distribution system, including transformers, switchgear, primary switches, and installation of poles. Work on underground cables and related equipment located in cable chambers, transformer vaults containing energized circuits
- In accordance with standards, specifications, instructions and accepted practices, makes splices and terminations, connects lines of various sizes and types, traces lines and applies identification devices. Makes line connections on equipment located in underground and overhead locations, customer premises, stations, tap boxes, cable pits and on poles, etc.
- Assists with the identification and phasing of lines and cables, using approved work procedures
- Provides adequate insulation while working on lines energized up to 750V
- Troubleshoots and locates cable faults on the underground distribution system. Assists in connecting, applying, analyzing and fault locating equipment including testing and locating grounds on 600V system (overhead and underground)
- Performs switching operations (overhead and underground)
- Assists the Crew Leader to install test equipment on various electrical distribution systems (overhead and underground)
- Actively participates in all training programs as provided through classroom and on the job instruction
- Operates a vehicle requiring a DZ license and associated equipment related to the position

Requirements:

✓ Minimum two (2) year College Diploma in an Electrical field of study (Electrical Engineering, Energy Systems Engineering or Powerline preferred)
✓ Consideration given to 309A Electrician (Red Seal) certification with a combination of relevant education and experience (preference will be given to those with post-secondary education)
✓ Valid class “G” License in the Province of Ontario and must be able to obtain a “DZ” or higher Driver’s License at the time of offer
- Complies with safety guidelines
- Comfortable working at heights
- Demonstrated proficiency in a PC Windows environment and associated desktop software applications
