Introduction to the Fundamentals of Project Management

Clayton McLean
RCM Technologies

5:00–6:00 pm, Friday, Feb. 14, 2014, KHE119

ABSTRACT
The lecture is designed to provide an overview of the fundamentals of project management. We will review the 4 key stages of a project and we will discuss key areas to watch out for when planning and executing a project. The objective of the lecture is to provide a practical look into how engineering projects come to be. We will talk about the importance of: schedule/time management, tracking a budget, interpersonal skills (soft skills) and technical capability and how they all influence the outcome of a project.

BIOGRAPHY
Clayton McLean, M.A.Sc. graduated from Ryerson University, with an Bachelor of Engineering Degree - Aerospace in 2002. He then went on to obtain a Masters of Applied Science from the University of Toronto Institute for Aerospace Studies in 2004, focusing on structural analysis. Clayton immediately joined AMEC NSS Ltd after completing his Master’s degree and has held various positions through his career.

Currently Clayton acts as a Senior Technical Advisor to the Sr. Vice President of RCM Technologies Canada, providing support in the areas of project management, training and operations. RCM Technologies Canada is an engineering service provider to mainly the nuclear sector in Ontario.
