

Table of Contents

1 Introduction.....	1
2 Assembly Language Programming Tutorial.....	4
2.1 Assembly Language and Machine Code	4
2.2 Tutorial.....	6
2.2.1 Logging In, Creating and Running a Simple Motorola 68000 Program	6
2.2.2 Assembly Errors and Monitor Tutorial.....	10
2.2.3 Useful Monitor Commands	13
2.2.4 Machine Code Tutorial	18
3 FPGA Tutorial	20
3.1 Programmable Logic.....	20
3.2 Max+plusII Tutorial.....	20
3.2.1 Setup	20
3.2.2 Starting Max+plusII.....	22
3.2.3 Compiling Your Design.....	24
3.2.4 Timing Analysis.....	25
3.2.5 Simulating Your Design	25
3.2.6 Programming the Ultrazimo Board.....	27
3.2.7 Testing Your Design.....	28
3.2.8 Changing Pin Assignments in the Wrapper Files	28
3.3 Error Messages in Max+plusII	29
4 Assembly Language Laboratory Experiments.....	30
Lab M1 (M68000) Assembly Language Programming.....	31
Lab M2 (M68000) A Simple Instruction Interpreter	32
Lab M3 (M68000) Subroutines and Fibonacci Sequence	34
Lab M4 (M68000) Recursive Binary Search.....	35
Lab M5 (DUART) Program-Controlled Input and Output (Polling)	37
Lab M6 (DUART & Interrupts) Interrupt-Driven Output and Polling-Driven Input.....	39
Lab M7 (DUART & Interrupts) Input and Output Using Polling and Interrupts	40
Lab M8 (DUART & Interrupts) Counter and Interrupts	41
Lab M9 (PIT) Hex Keypad	42
Lab M10 (PIT) Parallel I/O and the LEGO Motors and Sensors	44
Lab M11 (CODEC) Playing with Sound: A/D, D/A Conversion & Signal Processing.....	46
Lab M12 (PIT & Interrupts) Interrupt-Driven I/O Using the LEGO Sensors	47
5 FPGA Laboratory Experiments.....	48
Lab F1 Altera Software Introduction and Use.....	49
Lab F2 Hierarchical Design.....	53
Lab F3 System Design Using State Machines and Arithmetic.....	55
Lab F4 System Design and Memory Arrays	59
Lab F5 Data Transfer on the M68000	61
Lab F6 Bus Arbitration on the M68000.....	69
Lab F7 (CODEC) Playing with Sound Using the Altera 10K70.....	74
6 M68000 Assembly Language Programs	76
6.1 M68000 Assembly Language	76
6.1.1 Comment.....	76

6.1.2 Statement	76
6.1.2.1 Expression.....	77
6.1.2.2 Number	77
6.1.2.3 ASCII Character	78
6.1.2.4 Symbol.....	78
6.1.3 Directives.....	78
6.1.3.1 ORG Directive	79
6.1.3.2 DC Directive	79
6.1.3.3 DS Directive	80
6.1.3.4 EQU Directive	80
6.1.3.5 EVEN Directive	81
6.2 Assembling an M68000 Assembly Language Program	81
6.3 Executing an M68000 Assembly Language Program	81
6.4 Putting It All Together	82
6.5 Parallel Port Download.....	85
6.6 Using C with the Ultragizmo Board	85
7 Using the FBUG Monitor Program.....	86
7.1 Starting the Monitor Program	86
7.2 Summary of Monitor Commands	87
7.2.1 Commands for Inspecting Memory	88
7.2.2 Commands for Controlling Execution.....	89
7.2.3 Miscellaneous Commands	90
8 The Ultragizmo Lab Board.....	91
8.1 DUART and Serial I/O	94
8.1.1 Communicating with the Terminal (Using Port B on DUART).....	94
8.1.2 DUART Autovectored Interrupts at Level 4	97
8.1.3 DUART Initialization	98
8.2 Interrupts on the Ultragizmo Board	100
8.2.1 M68000 Interrupts and the Interrupt Controller of MC68306.....	100
8.2.2 Interrupt Signal Assignments on the Ultragizmo Board.....	102
8.2.3 Interrupt Initialization.....	104
8.2.3.1 Vectored Interrupt at Level 1	105
8.2.3.2 Vectored Interrupt at Level 2	105
8.2.3.3 Autovectored Interrupt at Level 5.....	106
8.2.4 Generating Interrupts with the DUART	107
8.2.5 Generating Interrupts with the 16-Bit DUART Timer	107
8.2.5.1 Example 1 - Vectored Timer Interrupts	109
8.2.5.2 Example 2 - Autovectored Timer Interrupts.....	109
8.3 Parallel Interface/Timer	111
8.3.1 PIT Overview.....	111
8.3.2 Using the PIT to Understand Memory-Mapped I/O.....	113
8.3.3 Creating a Second PIT on the SFPGA.....	114
8.4 CPU Expansion Bus.....	115
8.5 SFPGA	117
8.5.1 LEDs	117
8.5.2 Hex Displays.....	118

8.5.3 SFPGA_DIGITAL Connector	120
8.5.4 SFPGA_CON40 Connector	121
8.5.5 SFPGA_LOGIC Connector	122
8.5.6 SFPGA_CON60 Connector	122
8.5.7 M68000 Bus to SFPGA Connections	123
8.5.8 SRAM to SFPGA Connections.....	125
8.5.9 CODEC to SFPGA Connections	126
8.5.10 Programmable Clock to SFPGA Connections	126
8.6 The CODEC and Audio I/O.....	127
8.7 Programmable Clock	130
9 Peripherals.....	131
9.1 Digital Protoboard.....	131
9.2 The Commodore 1352 Mouse	133
9.3 The Hex Keypad	135
9.4 Logic Analyzers	136
10 LEGO Control Board	137
10.1 Introduction.....	137
10.2 LEGO Control Board.....	138
10.3 LEGO Tutorial	139
10.4 Motors.....	140
10.5 Lights	141
10.6 Sensors	141
10.7 Sensor Interrupts	144
10.8 LEGO Construction	144
10.9 Lab and Project Suggestions.....	145
10.10 For More Information	145
10.11 Sample Programs	145
11 Future Ultragizmo Upgrades	152
11.1 Ultravideo VGA Board.....	152
11.2 Magnetic Compass.....	152
11.3 New Laboratory Experiments.....	152
12 Data Sheets	153
13 Index.....	155
