Ryerson University

Department of Electrical & Computer Engineering
Faculty of Engineering & Architectural Science

Course Outline (W2017)

ELE 804: Radio-Frequency Circuits and Systems

Instructor	NAME: Fei Yuan Office: ENG 433 Phone: 416-979-5000 ext: 6100 E-mail: fyuan@ryerson.ca Office Hours: Thur. 1-2 pm.
Calendar Description	This course deals with design of CMOS circuits for wireless communications. The theoretical component consists of: introduction to wireless communications, modulation schemes for wireless communications, characterization of RF circuits, architecture of RF transceivers, building block of RF transceivers (LNAs, mixers, RF filters, VCOs, frequency synthesizers, and power amplifiers), and electromagnetic compatibility. Students are required to complete a design project with a professionally prepared project report.
Prerequisites	*ELE724 or ELE734*
Compulsory Text(s):	1. *ELE 804 Lecture Notes* from Dr. Fei Yuan (available from D2L). 2. Laboratory manual: *ELE 804 Laboratory Manual* (available from D2L).
Reference Text(s)	1. T. Lee, *The Design of CMOS Radio-Frequency Integrated Circuits*, 2nd edition, Cambridge, 2004. 2. B. Razavi, *RF Microelectronics*, 2nd ed., Prentice-Hall, 2012. 3. B. Razavi, *Design of Integrated Circuits for Optical Communications*, McGrew-Hill, 2002.
Learning Objectives (Indicators)	At the end of this course, the successful student will be able to: 1) Improve their capabilities of using the technical knowledge of semiconductor devices, the building blocks of CMOS integrated circuits and computer-aided design tools to design complex radio-frequency CMOS integrated circuits for particular applications (***4d – Generate solutions***). Utilize computer-aided design tools for IC design to iteratively improve designed complex radio-frequency CMOS integrated circuits to meet the design specifications of given applications (***4h - Iterations***). **Assessment Methods:** Mid-term and final examination questions. 2) Proficiency in use of computer-aided design tools from Cadence Design Systems for integrated circuit design to design and analyze complex radio-frequency CMOS integrated circuits. (***5c – Use of engineering tools***) **Assessment Methods:** Use of computer-aided design tools from Cadence Design Systems for design of RF circuits in laboratory design projects. 3) Write professionally prepared laboratory and course project reports in confirmation to IEEE format. Project reports are evaluated on their correctness, completeness, English, and quality of graphics (***7a – Written, 7d - Graphical***)

	Assessment Methods: Professionally prepared laboratory design reports. **NOTE**: *Numbers in parentheses refer to the graduate attributes required by the Canadian Engineering Accreditation Board (CEAB).*
Course Organization	3 hours of lecture per week for 13 weeks, 1 section. 2 hours of lab per week for 13 weeks 1 Lab/tutorial sections of maximum 22 students 1 Teaching Assistant, 1 section per TA
Teaching Assistants	(The following is a Table and you can add/remove rows/columns as needed) Young Jun Park — Youngjun.park@ryerson.ca
Course Evaluation	(The following is a Table and you can add/remove rows/columns as needed) Midterm Exam: 30 % Lab Projects: 30 % Final Exam: 40 % **TOTAL**: 100 %
Examinations	1.5 hour midterm exam with date to be determined in class. Final exam, during exam period, 3 hours, closed-book covering all course materials.
Other Evaluation and/or Information	None

Course Contents

Chap.	Sections	hours	Topic, description
1	N/A	3	**Module 1 - Architecture of RF transceivers**
2	N/A	6	**Module 2 - Impedance transformation** 1) Maximum power transfer theorem 2) Two-port parameters 3) Impedance transformation
3	N/A	6	**Module 3 - Low-Noise Amplifiers** 1) Fundamentals 2) 2-port noise parameters of MOSFETs 3) Input impedance matching 4) Topology of LNAs
4	N/A	6	**Module 4 - Mixers** 1) Fundamentals 2) Classification of mixers **3)** Topology of mixers
5	N/A	9	**Module 5 - Frequency synthesizers** 1) Phase-locked loops 2) Frequency dividers 3) Integer-N frequency synthesizers 4) Fractional-N frequency synthesizers
6	N/A	6	**Module 6 - Power amplifiers**

			1) Class A power amplifiers 2) Class B power amplifiers 3) Class C power amplifiers 4) Class D power amplifiers 5) Class E power amplifiers 6) Class F power amplifiers

Laboratory/Tutorials

Week	Title	Room
4-8	Low-noise amplifier for Bluetooth applications	ENG 412
9-12	Mixers	ENG 412

Important Notes

1. All of the required course-specific written reports will be assessed not only on their technical/academic merit, but also on the communication skills exhibited through these reports.

2. All assignment and lab/tutorial reports must have the standard cover page which must be signed by the student(s) prior to submission of the work. Submissions without the cover page **will not** be accepted. The cover page can be found on the departmental web site: Standard Assignment/Lab Cover Page

3. Should a student miss a mid-term test or equivalent (e.g. studio or presentation), with appropriate documentation, a make-up assessment ***may*** be scheduled. Alternatively, the weight of the missed work is placed on the final exam, or another single assessment. This may not cause that exam or assessment to be worth more than 70% of the student's final grade. If a student misses a scheduled make-up test or exam, the grade may be distributed over other course assessments even if that makes the grade on the final exam worth more than 70% of the final grade in the course. Make-up assessments cover the same material as the original assessment but need not be of an identical format.

4. Students who miss a final exam for a verifiable reason and who cannot be given a make-up exam prior to the submission of final course grades, must be given a grade of INC (as outlined in the *Grading Promotion and Academic Standing Policy)* and a make-up exam (normally within 2 weeks of the beginning of the next semester) that carries the same weight and measures the same knowledge, must be scheduled.

5. Medical or Compassionate documents for the missing of an exam must be submitted within 3 working days of the exam. Students are responsible for notifying the instructor that they will be missing an exam as soon as possible.

6. **If a student is requesting accommodation due to a religious, aboriginal and/or spiritual observance, he or she must submit a Request for Accommodation of Student Religious, Aboriginal, and Spiritual Observance AND an Academic Consideration form within the FIRST TWO WEEKS OF CLASS or, for a final examination, within two weeks of the posting of the examination schedule**. If the required absence occurs within the first two weeks of classes, or the dates are not known well in advance as they are linked to other conditions, these forms should be submitted with as much lead time as possible in advance of the required absence.
   Both documents are available at http://www.ryerson.ca/senate/forms/relobservforminstr.pdf. Full-time or part-time degree students must submit the forms to their own program department or school.

7. The results of the first test or mid-term exam will be returned to students before the deadline to drop an undergraduate course in good Academic Standing.

8. Students are required to adhere to all relevant University policies including:
   - Undergraduate Grading, Promotion and Academic Standing: http://www.ryerson.ca/senate/policies/pol46.pdf
   - Student Code of Academic Conduct: http://www.ryerson.ca/senate/policies/pol60.pdf
   - Student Code of Non-Academic Conduct: http://www.ryerson.ca/senate/policies/pol61.pdf
   - Undergraduate Academic Consideration and Appeals: http://www.ryerson.ca/senate/policies/pol134.pdf
   - Examination Policy: http://www.ryerson.ca/senate/policies/pol135.pdf
   - Course Management Policy: http://www.ryerson.ca/senate/policies/pol145.pdf

- Accommodation of Student Religious, Aboriginal and Spiritual Observance: http://www.ryerson.ca/senate/policies/pol150.pdf
- Establishment of Student E-mail Accounts for Official University Communication: http://www.ryerson.ca/senate/policies/pol157.pdf

9. Students are required to obtain and maintain a Ryerson e-mail account for timely communications between the instructor and the students.

10. Any changes in the course outline, test dates, marking or evaluation will be discussed in class prior to being implemented.

11. Assignments, projects, reports and other deadline-bound course assessment components handed in past the due date will receive a mark of ZERO. Marking information will be made available at the time when such course assessment components are announced.

12. If you have taken the course previously and are currently looking to get a laboratory exemption, then you must fill out this form: http://www.ee.ryerson.ca/guides/ECE-LabExemptionForm.pdf
